2.attempt 🟡

Price depends on the method of processing. It can not be discussed on the Internet.

Hi.

We'll tell you how our project goes... 🟡

In this moment we are looking for a chasis with motor working properly. Land rover 109 type seems good.

LR 109 ?? sry -> Typical first mistake. The repair would cost you a lot of money. (Like me) I just saved you a year of life. 🙄

Sure??, there are a large quantities of spare parts of this vehicle, here in Spain and low cost.

what is your option for a chasis?

Thanks

Need a car with suspension. Not with leaf springs. You do not remake storage axles. This might turn out like a car from Poland. The vehicle will be too high and the leaf springs are visible. RR Clasic cca 1973.
